

BEYOND PET APPLICATIONS

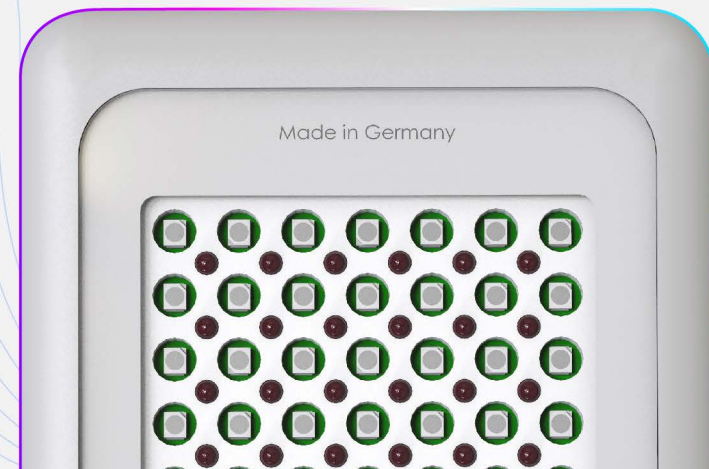

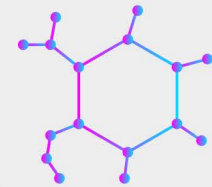

THE ANIMAL & HUMAN BIOLOGY

The basis of humans' biology contains an immense amount of shared fundamentals with animals. We share many traits with animals in terms of biological and metabolic complexities.

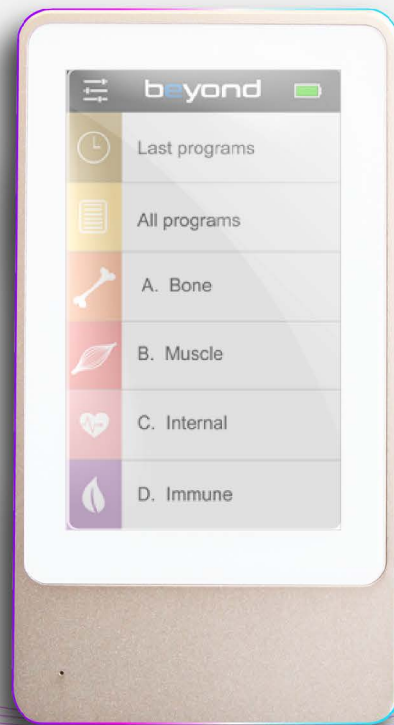

Although humans and animals (technically “non-human animals”) may look different, at a physiological and anatomical level they are remarkably similar. Animals, from mice to monkeys, have the same organs (heart, lungs, brain etc.) and organ systems (respiratory, cardiovascular, nervous systems etc.) which perform the same functions in pretty much the same way. The similarity means that nearly 90% of the veterinary medicines that are used to treat animals are the same as, or very similar to, those developed to treat human patients.

Therefore, compensation of cellular communication has a major impact on animal health as well as humans.

HELP OUR ANIMAL FRIENDS WITH BEYOND

BEYOND pet application program has been developed to help our animal friends as an integrative approach to overcome the issues they face with both physical and mental/emotional/psychological.

PET FRIENDLY APPLICATION

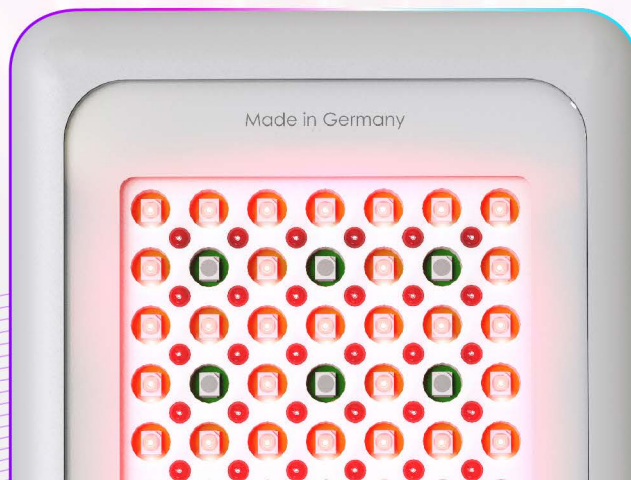

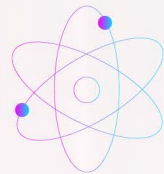

Animals are also being affected and under the influence of the very **same factors** - both internal and external - as major stimulants disrupting the ongoing biocommunication resulting in certain physical and psychological complications.

QUANTUM LIGHT OSCILLATOR

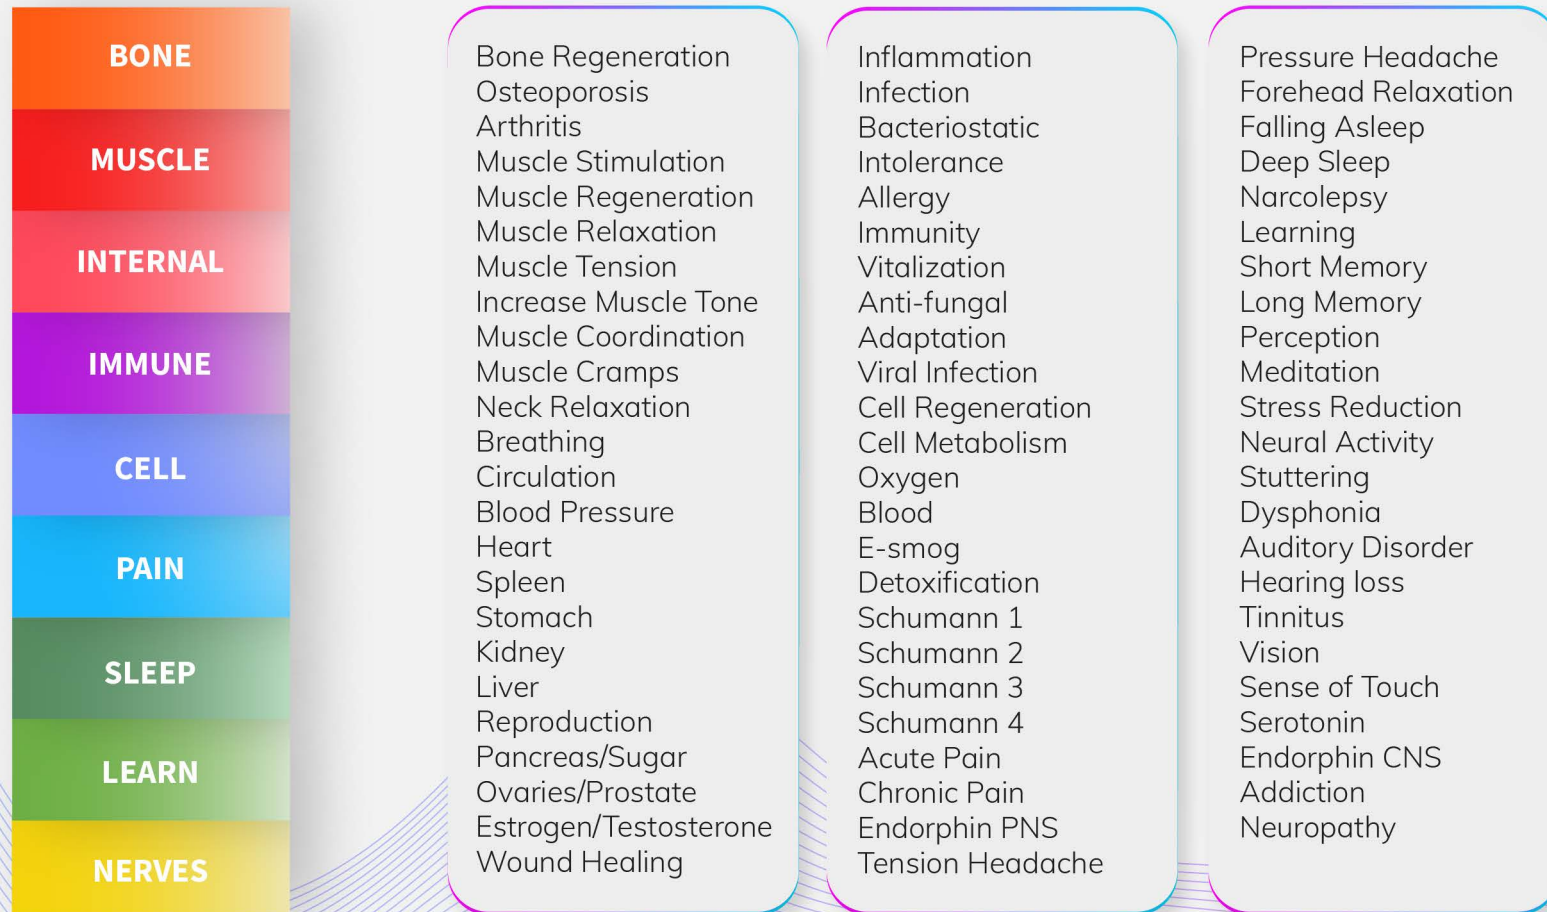

BEYOND is a **bio-photon emitting quantum light oscillator** designed to provide required modulation capacities as fractal frequency patterns to normalize disrupted communication between systems and sub-systems.

BEYOND programs designed in such a way that they're suitable and applicable for both **humans and animals**.

71 APPLICATION PROGRAMS

BEYOND has equipped with 71 application programs under 9 different categories and all BEYOND programs can be used on animals and pets without a problem.

Please see the document “[Beyond Application Guide](#)” referring to complications related to human applications. The very same application modalities can be adopted and utilized for animals/pets as well.

Regular applications in the device utilization to have the best desired results is requisite and recommended for any users.
